DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and **"said," should be avoided**. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Objections

3. Claim 5 objected to because of the following informalities:

In claim 5, line 5, "after "signal", --level-- should be inserted.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-22 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 11098426.

As to claims 1, 5-13 and 15, JP 11098426 discloses the claimed subject matter, the claimed amplifying the received television signal is met by the tuner 20 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 2, the claimed limitation is disclosed by JP 11098426 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 3, the claimed limitation is inherently disclosed by JP 11098426.

As to claim 4, the claimed limitation is disclosed by JP 11098426 (Fig. 2, reference numeral 21, 12a, 12b, 15).

As to claim 14, the claimed AGC circuit is met by the AGC circuit 14a, 14b of JP 11098426 (Fig. 2)

As to claims 16 and 19-22, JP 11098426 discloses the claimed subject matter, the claimed RF tuner which includes a RF amplifier is met by the tuner 20 and the claimed AGC circuit which includes digital and analog IF circuit is met by the AGC circuit 14a, 14b (Fig. 2, paragraphs 0011-0016 of the translation).

Art Unit: 2622

As to claim 17, the claimed limitation is disclosed by JP 11098426 (Fig. 2, paragraphs 0011-0016 of the translation).

As to claim 18, the claimed IF tuner is met by the IF processor 12a, 12b.

Ogasawara discloses an automatic gain control circuit having a tuner.
